

## DIY kits

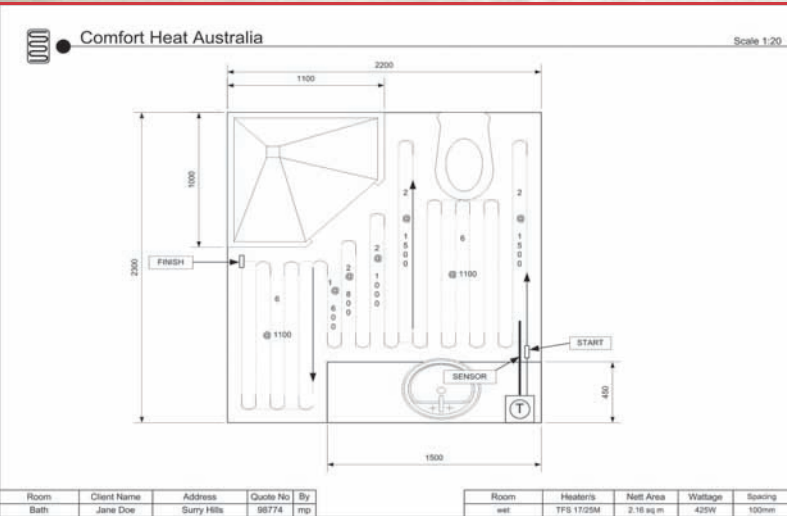

The complete range of Comfort Heat cables are available in diy kits. All the required heating cables and accessories needed to complete installation are included in the kit.

All kits are quoted directly from your floor plan with 100mm -200mm clearance from walls and fixtures.

Comfort Heat stocks a range of twin conducting cables which cut your installation time in half. The heating cable begins at your thermostat location and finishes at the other side of the room - perfect for small bathrooms.

A detailed design layout is included with all kits providing you with exact layout and cable runs, making installation simple and assuring you have an even distribution of heat.

All Comfort Heat kits are all stocked and once kit size has been determined, it can be sent out the same business day.

### All kits include:

- Comfort Heat heating cable or mat
- Electronic wall thermostat - Model MTD2
- Floor sensor
- Floor sensor tube
- Metal retaining mesh or strip
- Metal retaining clips/pliers or cable ties
- Installation instructions
- Personalised design layout
- Electrical loads and wiring diagrams
- Cable safe monitor (test cable during installation)

Optional thermostat upgrade to:  
 MWD5 - Programmable 7 day event  
 ETN4 - Home automation compatible
