

# hydronic floor heating diy kits

All hydronic Comfort Heat systems are available in DIY underfloor heating kits and delivered Australia wide to trade and/or owner builders.

Hydronic underfloor heating kits include all hydronic specific components required to complete a finished hydronic system, excluding standard plumbing materials.

Comfort Heat underfloor heating kits are designed to be highly efficient and are available with a range of heat sources, custom designed to suit your individual needs.

All hydronic underfloor heating kits include a design manual, operational manual, installation guide, custom schematics and tele-support.

## Stage your kit:

Ask us about purchasing a DIY kit in stages.
